

Classroom News

Class 1

In Class 1 this week, we have been learning how to write the number 8, subitising and finding out different ways of making 8. We have also been learning the phonemes 'u', 'g' and 'o' and how to read and write them. Some of the class have made yummy bread rolls this week, with the remaining children having their opportunity next week. We have also made large poppies for a window display and learnt about why we wear them. The children also took part in their first 'Local Curriculum Day' and Miss Morris and I were very proud of how sensible and courageous they all were. Well done children!

Class 2

In our topic lessons this week, we have been continuing with our 'continents' topic and have looked at Asia. We have discussed different countries, famous landmarks and have made a fact file about a specific animal who lives there. We have also been looking at Remembrance Day and have discussed the importance of poppies and what they symbolise.

Class 3

This week, Class 3 have been studying evidence of cave painting in History, and creating some of our own using chalk. Our Science work has involved identifying man-made sources of light. We are continuing with multiplication and data handling in Maths. Our Artwork is currently focussed on studying the work of Escher, and producing tessellating patterns.

Class 4

What a busy week we have all had! We have been developing strategies for adding up several numbers and self-checking our answers in maths, ready to apply our skills to some problem solving activities. In English, we have been learning about collective nouns and have a good understanding of these. We have been investigating Anglo Saxon religion and have carried out some independent research, which we have been able to present in different ways. We all enjoyed our first Local Curriculum Day and worked well with other members of the school on various projects. We have started preparing for our Christmas Carol Concert with lots of words to start learning for homework.
